

ANUVANSHIKI SIDDHANT IN AYURVEDIC SHARIR (PRINCIPLES OF INHERITANCE IN AYURVEDIC ANATOMY)

*G.S. Lavekar *, N.S. Bhatt ***

The inheritance of characters has always been a fascinating subject for both a scientist and a layman.

Modern medical sciences have explained this phenomenon with the help of Genetics. It is interesting to know that ancient sciences give precise ideas about this phenomenon.

There are various references in Ayurvedic texts, which are related with inheritance of a particular characteristic or disease of a person.

It is proposed to enlighten the Ayurvedic concept and understanding about 'Inheritance' in this paper.
