

**Analysis of 128 Cases of *Galaganda* - *Gandamala* (Lymphadenopathy) Treated during 1929 to 1933 by an Ayurvedic Physician Vaidya Mayashankar Bhatt**

*Narendra Someshwar Bhatt; Vandana Kozarekar*

---

The study provides the analysis of 128 cases of *Galaganda* – *Gandamala* (Lymphadenopathy) treated by individual physician with ayurvedic therapeutics. The objective of this study is to transcribe the historical expressional documented proof of the case studies of lymphadenopathy treated successfully by an ayurvedic practitioner in his dispensary at the time when no diagnostic tools were available. The objective is also to understand different clinical and therapeutic approach and the same time to observe the efforts made by the physician to bring in clinical objectivity and thereby to establish the evidence of Ayurvedic principals.
