

CLINICAL EFFECT OF AN AYURVEDIC DRUG L 2002 @ IN HEPATO-BILIARY DISORDERS

Deshpande P.J. , Singh R * , Bhatt N.S.***

45 cases of surgery- related, hepato-biliary disorders – 7 with history of cholecystectomy, 21 operated for other gall bladder pathology, 12 with hepatitis and 5 with T-tube biliary drainage after cholecystectomy - were treated with an Ayurvedic drug L 2002. The clinical and Biochemical observations indicate improved liver functions in terms of hepatitis control, bile flow and associated symptoms like pain, flatulence, dyspepsia and nausea. These preliminary findings suggest a positive role; Ayurvedic drugs can play in surgery – related hepatic dysfunctions.
